

Ashurst Hospital

Building a vision for the future

An opportunity to provide a health centre for children, young people and families in the New Forest

We would like to hear your views

Quality services, better health

The Future

As part of the West Hampshire Clinical Commissioning Group's commitment to providing more healthcare in the community, we are looking at what services for children, young people and families could be provided at Ashurst Hospital in the short and long term. It will not be possible to provide all services at Ashurst Hospital so we need to assess which are most needed locally and appropriate to deliver in this setting.

In the future, planned housing developments and an increase in demand on services will mean we have to plan new ways of providing healthcare to the local population.

All these factors will be taken into account as West Hampshire CCG plans for the future. It is important that we listen to our local community and take into account their views when considering what services should be provided at Ashurst Hospital.

Current health services

- The New Forest Birth Centre – a midwife led birth unit
- Child and Adolescent Mental Health
- Paediatric Audiology (hearing tests)

Future health services at Ashurst?

- Speech and Language therapy
- Physiotherapy
- A range of health clinics for children, young people, families and carers
- Your suggestions?

Have your say

We have an opportunity to modernise Ashurst Hospital.

We want to provide healthcare services for children, young people and families living in the New Forest and Totton and Waterside area with facilities which are friendly and welcoming, high quality and meet today's standards.

More importantly, we want them to be designed for and by children, young people and families living in the local area.

We would really like to hear from you about our vision and whether you have any questions, suggestions, thoughts or concerns.

Background

The original hospital building was constructed in 1836 as a New Forest Union Workhouse.

It became part of the NHS in 1948 and was renamed Ashurst Hospital.

A range of health services for children used to be provided at Ashurst Hospital but over time, they moved away because the old buildings were not suitable anymore.

It is time for a change.
